Admin Directions

A Guide on Using WPScribe

1. Configure WPScribe Authorize.NET in WooCommerce Settings.
2. How to obtain API Key & Transaction Key of Authorize.NET.
3. Configure WPScribe Stripe in WooCommerce Settings.
4. How to get Secret Key of Stripe.
5. Configure WPScribe 2Checkout in WooCommerce Settings.
6. How to get Seller ID, Publishable Key and Private Key of 2Checkout.
7. Configure Subscription Product.
8. Cron Set Up.
9. Software Specification.

## 1) Configure WPScribe Authorize.NET in WooCommerce Settings.

You can configure the settings from,  
WP Admin > WooCommerce > Settings > Payments

≡	<b>WPScribe Authorize.Net</b>	<input checked="" type="checkbox"/>	WPScribe Payment Gateway for subscribers	<a href="#">Manage</a>
≡	<b>WPScribe Stripe</b>	<input checked="" type="checkbox"/>	WPScribe Payment Gateway for subscribers	<a href="#">Manage</a>
≡	<b>WPScribe 2Checkout</b>	<input checked="" type="checkbox"/>	WPScribe 2Checkout Payment Gateway for subscribers	<a href="#">Manage</a>

There are 3 payment gateways (Authorize.Net, Stripe, 2Checkout) are available for this plugin. You can use any one of them for checkout process, it depends on subscription product configuration (discussed in later pages). Please note user can checkout subscription product or buy a subscription product only through these 3 (WPScribe Authorize.Net, WPScribe Stripe and WpScribe 2Checkout) payment gateways.

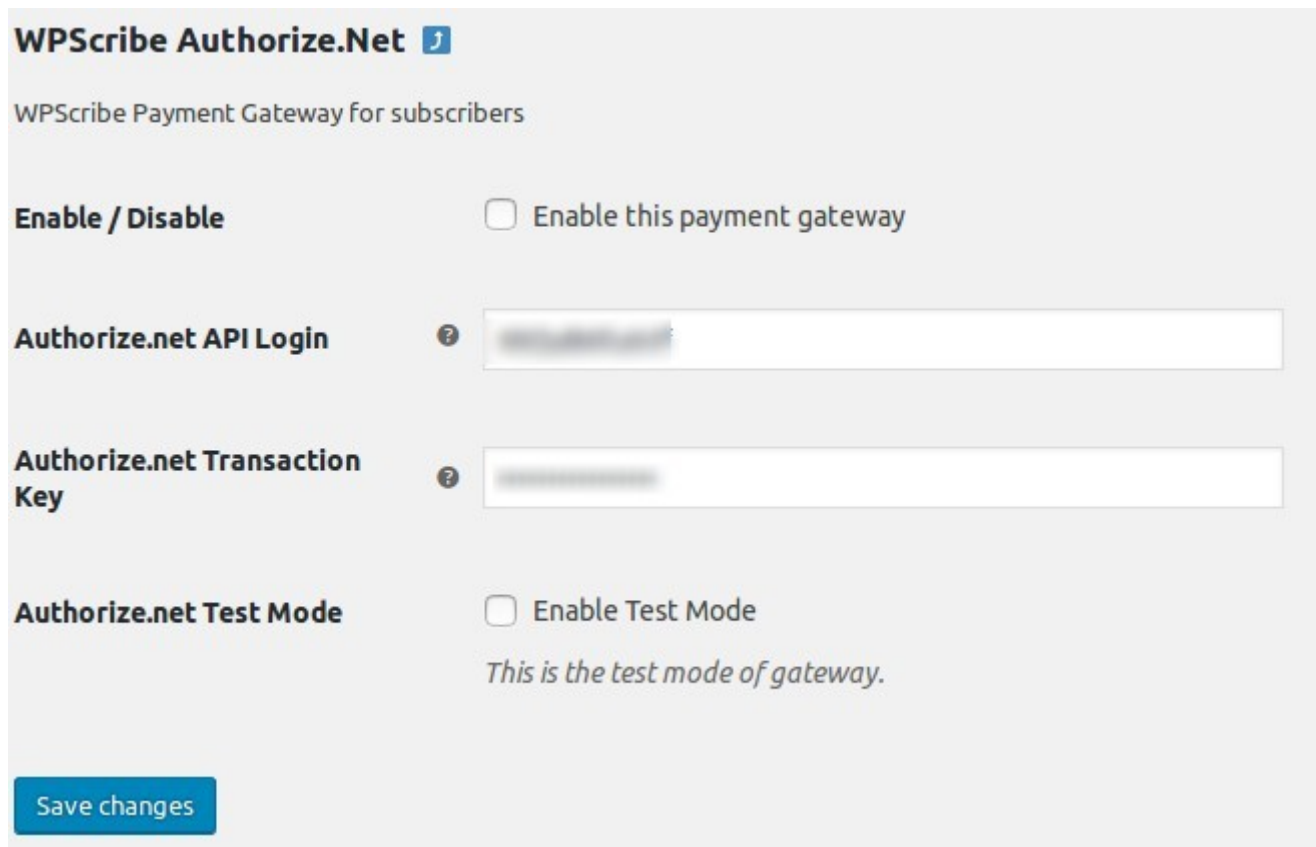

Now we are going to discuss each payment gateway configuration one by one.

## 1) Configure WPScribe Authorize.NET in WooCommerce Settings.

You can get the settings from,

WP Admin > WooCommerce > Settings > Payments

Click on Manage button of WPScribe Authorize.Net row.

The screenshot shows the 'WPScribe Authorize.Net' settings page. At the top, it says 'WPScribe Payment Gateway for subscribers'. Below this, there are four main sections: 'Enable / Disable' with a checkbox for 'Enable this payment gateway'; 'Authorize.net API Login' with a text input field; 'Authorize.net Transaction Key' with a text input field; and 'Authorize.net Test Mode' with a checkbox for 'Enable Test Mode' and a note 'This is the test mode of gateway.' At the bottom left, there is a blue 'Save changes' button.

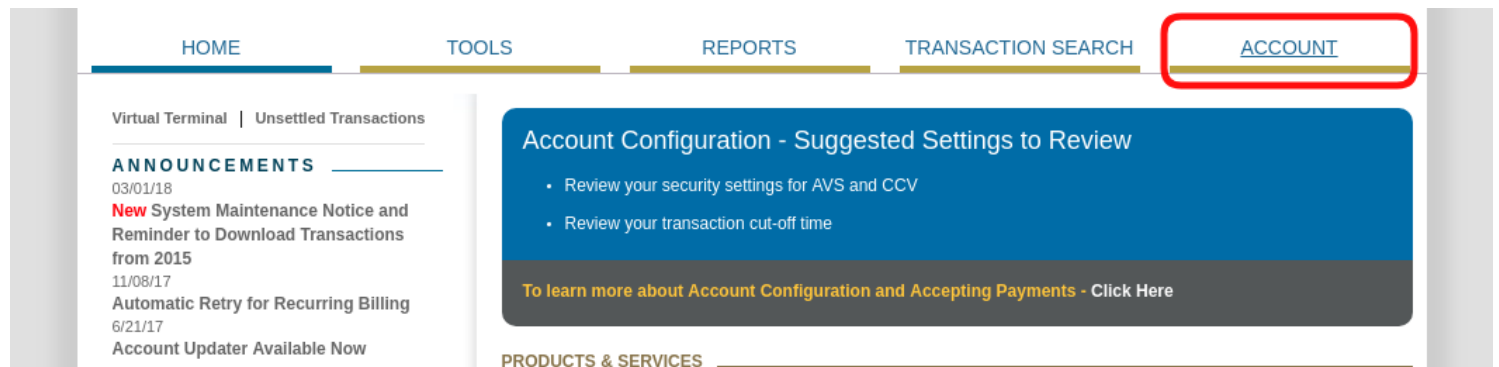

- **Enable / Disable**, this option allows you to active or inactive this payment gateway.
  - **Authorize.net API Login**, put API Login here collected from Authorize.Net account.
  - **Authorize.net Transaction Key**, put Transaction Key here collected from Authorize.Net account.
  - **Authorize.net Test Mode**, checked mark if you want to run this payment gateway in test mode otherwise just leave it as unchecked. Also please check your account is on Live mode or Sandbox mode.
- Click Save changes button to save your setting.

## 2) How to obtain API Key & Transaction Key of Authorize.Net

Logged into <https://sandbox.authorize.net/> if you use Sandbox Mode.  
Or logged into <https://account.authorize.net/> if you use Live Mode.

From Authorize.Net dashboard,

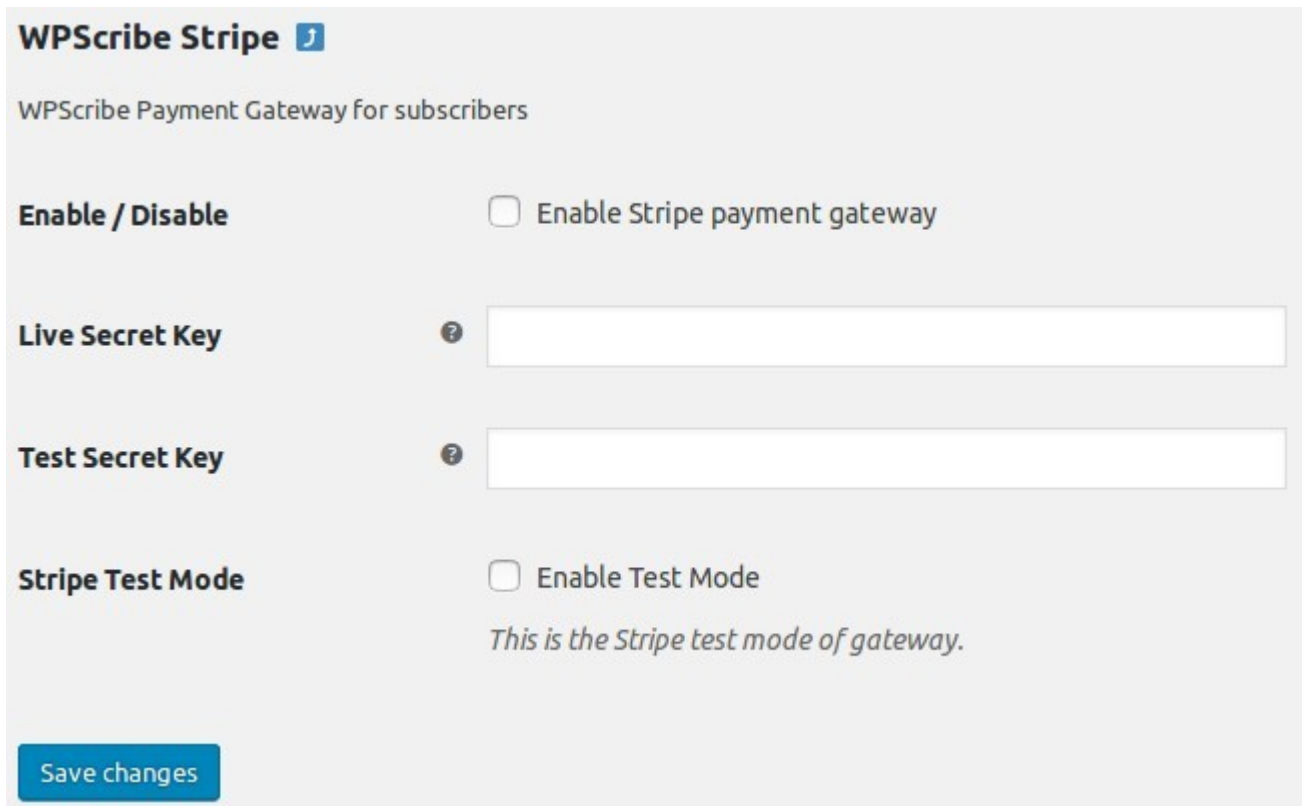

Click Account from the main toolbar > Click API Credentials & Keys under Security Settings.

Here your API Login and Transaction Key, (unique pieces of information) associated with your account is available.

### 3) Configure WPScribe Stripe in WooCommerce Settings

Click on Manage button of WPScribe Stripe row.

The screenshot shows the 'WPScribe Stripe' settings panel. At the top, it says 'WPScribe Payment Gateway for subscribers'. Below this, there are four main sections: 'Enable / Disable' with a checkbox for 'Enable Stripe payment gateway'; 'Live Secret Key' and 'Test Secret Key', each with a question mark icon and a text input field; and 'Stripe Test Mode' with a checkbox for 'Enable Test Mode' and a note below it stating 'This is the Stripe test mode of gateway.' At the bottom left is a blue 'Save changes' button.

- **Enable / Disable**, this option allows to active or inactive this payment gateway.
- **Live Secret Key**, put Secret Key if you want to run this payment gateway in live mode.
- **Test Secret Key**, put Secret Key if you want to run this payment gateway in test mode.
- **Stripe Test Mode**, checked if you want to run this payment gateway in test mode otherwise just leave it as unchecked.

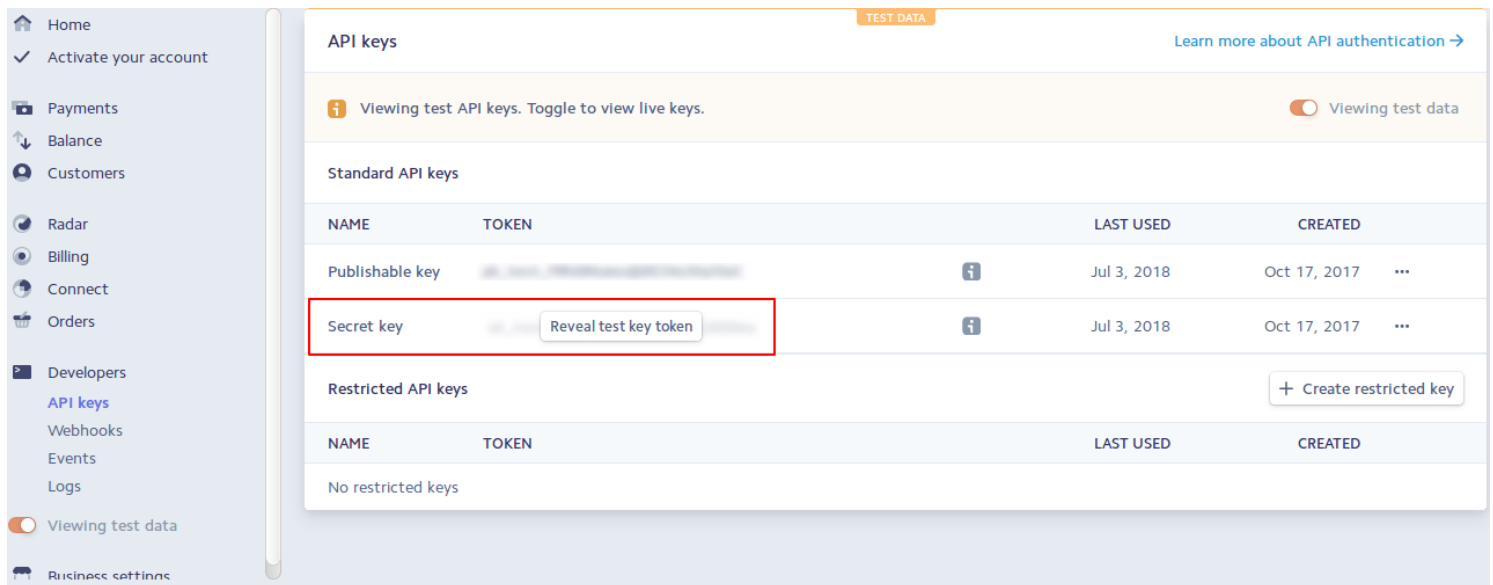

Click Save changes button to save your setting.

## 4) How to obtain Secret Key of Stripe

Logged into <https://dashboard.stripe.com/login>

From Stripe dashboard

Click on Developers > API keys > Collect Secret Key

The screenshot shows the Stripe dashboard's 'API keys' section. The left sidebar contains navigation links: Home, Activate your account, Payments, Balance, Customers, Radar, Billing, Connect, Orders, Developers (selected), API keys (selected), Webhooks, Events, Logs, Viewing test data (toggle), and Business settings. The main content area is titled 'API keys' and includes a 'TEST DATA' tab. A message states 'Viewing test API keys. Toggle to view live keys.' with a toggle switch for 'Viewing test data'. Below this, there are two sections: 'Standard API keys' and 'Restricted API keys'. The 'Standard API keys' section contains a table with columns: NAME, TOKEN, LAST USED, and CREATED. It lists two keys: 'Publishable key' and 'Secret key'. The 'Secret key' row is highlighted with a red box, and a 'Reveal test key token' button is visible next to its token. The 'Restricted API keys' section shows a '+ Create restricted key' button and a table with the same columns, currently displaying 'No restricted keys'.

NAME	TOKEN	LAST USED	CREATED
Publishable key	[REDACTED]	Jul 3, 2018	Oct 17, 2017
Secret key	[REDACTED]	Jul 3, 2018	Oct 17, 2017

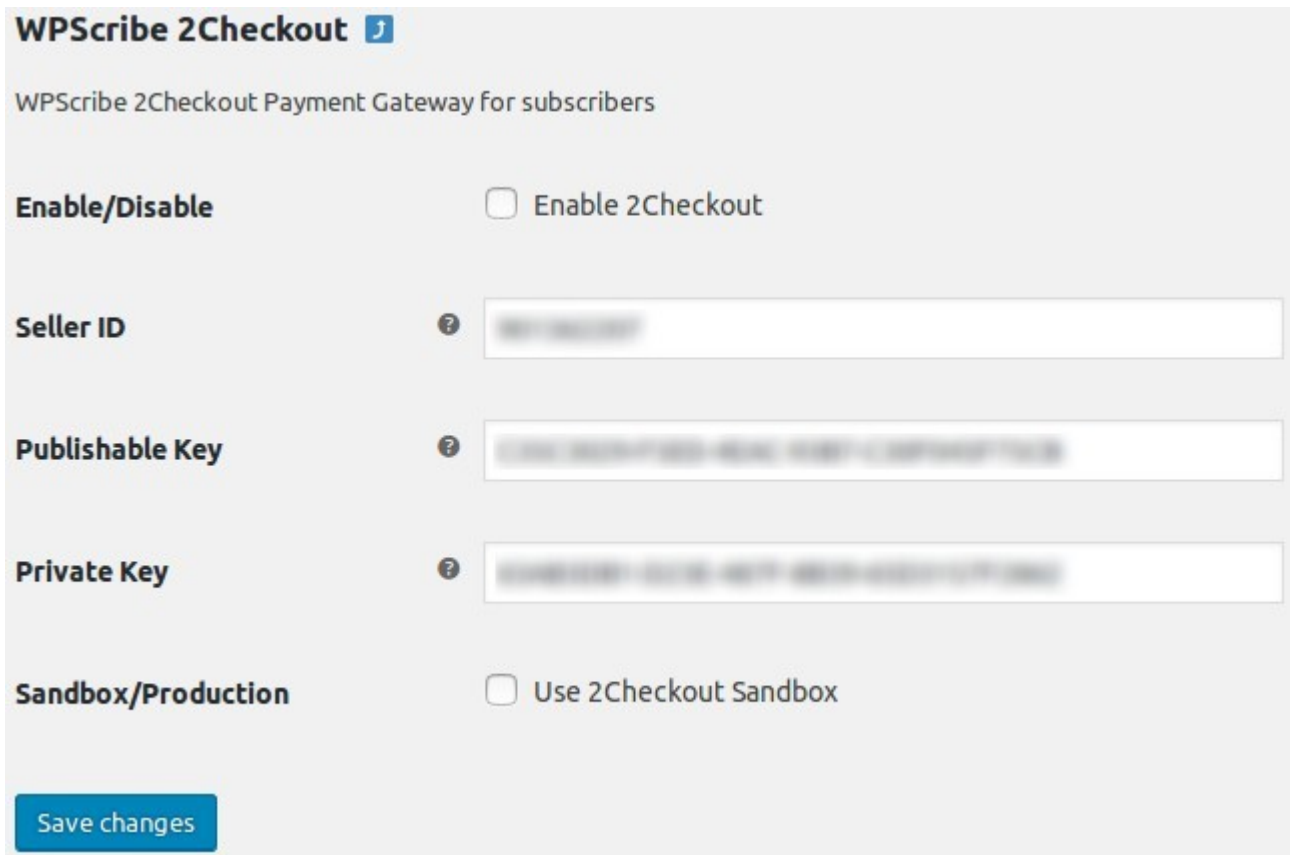

Check your stripe account.

If your account is in Test Mode then put your Secret key on “**Test Secret Key**” of WPScribe Stripe setting.

If your account is in Live Mode then put your Secret key on “**Live Secret Key**” of WPScribe Stripe setting.

## 5) Configure WPScribe 2Checkout in WooCommerce Settings

Click on Manage button of WPScribe 2Checkout row.

The screenshot shows the 'WPScribe 2Checkout' settings page. At the top, it says 'WPScribe 2Checkout Payment Gateway for subscribers'. Below this, there are several settings:

- Enable/Disable:** A checkbox labeled 'Enable 2Checkout' is currently unchecked.
- Seller ID:** A text input field with a question mark icon to its left. The field contains a blurred value.
- Publishable Key:** A text input field with a question mark icon to its left. The field contains a blurred value.
- Private Key:** A text input field with a question mark icon to its left. The field contains a blurred value.
- Sandbox/Production:** A checkbox labeled 'Use 2Checkout Sandbox' is currently unchecked.

At the bottom left, there is a blue button labeled 'Save changes'.

- **Enable / Disable**, this option allows to active or inactive this payment gateway.
- **Seller ID**, put your 2Checkout account's Seller ID (Account Number).
- **Publishable Key**, put your 2Checkout Publishable Key.
- **Private Key**, put your 2Checkout Private Key.
- **Sandbox/Production**, checked if you want to run this payment gateway in test mode otherwise just leave it as unchecked.

Click Save changes button to save your setting.

## 6) How to obtain Seller ID, Publishable Key and Private Key of 2Checkout

Logged in <https://sandbox.2checkout.com/sandbox> for sandbox users.  
Logged in <https://www.2checkout.com/> for live users.  
Here we consider the sandbox account.

From 2Checkout dashboard

## 6) How to obtain Seller ID, Publishable Key and Private Key of 2Checkout

Here your Seller ID(Account Number) is available.

## 7) Configure Subscription Product with WPScribe Authorize.Net

You can configure the settings from,

WP Admin > Products > Add New > Product data - Subscription Product

Click on Subscription tab.

The screenshot shows the 'Product data' section for a 'Subscription Product'. The left sidebar contains tabs: General, Shipping, Linked Products, Stripe Configuration, 2Checkout Configuration, Subscription (selected), Attributes, and Advanced. The main content area has three settings:

- Payment Method:** A dropdown menu showing 'WPScribe Authorize.Net'. A red arrow points to this dropdown.
- Subscription Renewal Length:** A dropdown menu showing '10' and a unit dropdown showing 'Day'. A red arrow points to the '10' dropdown.
- Subscription Total Length:** A dropdown menu showing '30' and a unit dropdown showing 'Day'. A red arrow points to the '30' dropdown.

- **Payment Method**, choose Payment method as WPScribe Authorize.Net from the drop down.
- **Subscription Renewal Length**, choose Subscription Renewal Length and unit as Day, Month etc.
- **Subscription Total Length**, choose Subscription Total Length(How long it will continue) and unit as Day, Month etc.

## 7) Configure Subscription Product with WPScribe Stripe

You can configure the settings from,

WP Admin > Products > Add New > Product data - Subscription Product.

Please choose **Payment Method**, as WPScribe Stripe from the drop down Subscription tab.

Click on Stripe Configuration.

The screenshot shows the 'Product data' section for a 'Subscription Product'. The left sidebar contains several tabs: General, Shipping, Linked Products, Stripe Configuration (selected), 2Checkout Configuration, Subscription, Attributes, and Advanced. The main content area displays two fields: 'Plan ID' and 'Price'. The 'Plan ID' field has a placeholder 'Plan id here...' and a red arrow pointing to a question mark icon. The 'Price' field has a placeholder 'Price here...' and a red arrow pointing to a question mark icon.

- Plan ID, put plan id from your Stripe account.
- Price, put price of the plan from your Stripe account.

## Obtain WPscribe Stripe Plan ID and Price

Logged into <https://dashboard.stripe.com/login>

From Stripe Dashboard

Billing > Products > New

TEST DATA			<a href="#">+ New</a>
NAME	PRICING	CREATED	
<a href="#">Yearly Plan</a>	\$5.00 USD / year	2017/10/26 16:53	
<a href="#">Weekly Plan</a>	\$4.00 USD / week	2017/10/26 16:52	
<a href="#">Daily Plan</a>	\$3.00 USD / day	2017/10/26 16:52	
<a href="#">monthly-plan</a>	\$2.00 USD / day	2017/10/26 13:26	
4 results			<a href="#">Previous</a> <a href="#">Next</a>

Now fill the product entry form, it look like, no need to fill the optional fields.

[Product](#) > [Pricing plan](#)

TEST DATA

### Create a product

A product is something to which your customers subscribe. For example, the enterprise tier of a software product or usage of an API. You'll add plans next to define this product's pricing.

**Product name**  
This will appear on customers' receipts and invoices.

**Unit label** OPTIONAL  
This will represent a unit of this product, such as a seat or API call, on customers' receipts and invoices.

**Statement descriptor** OPTIONAL  
This will appear on customers' bank statements, so make sure it's clearly recognizable.

[Cancel](#) [Create product](#)

Give the Product name, and click on Create Product. It redirect to you next page,

# Obtain WPSubscribe Stripe Plan ID and Price

Product > Pricing plan

TEST DATA

### Add a pricing plan for abc

Pricing plans define how customers will be billed for this product. You may want to add multiple pricing plans for this product if you sell it in multiple intervals, currencies, or other price variants.

**Plan nickname**  
This won't be visible to customers, but will help you find this plan later.

Monthly

**ID** OPTIONAL  
This will identify this plan in the API. We recommend leaving this blank so we can generate an ID for you.

**Pricing**

Not sure? [Learn more.](#)

☒ **Recurring quantity**  
Bill customers at the start of each period for a set quantity.  
For example, seats for a SaaS product.

☐ **Metered usage**  
Bill customers at the end of each period for reported usage.  
For example, API calls made.

**Currency**

USD - US Dollar

**Does this pricing plan have multiple price tiers based on quantity?**

☐ Yes ☒ No

**Price per unit**

\$ 0.00

per unit

**Billing interval**

Monthly

**Trial period** OPTIONAL  
Subscriptions to this plan will automatically start with a free trial of this length.

0

days

**Preview**

Complete all of the information above to see a summary of this pricing plan.

You'll only be able to edit this plan's nickname and trial period after it's created.

Cancel

Add pricing plan

Fill the details and click Add pricing plan button. Use this ID and Price as Plan ID and Price of Subscription product configured through Stripe Configuration.

# Configure Subscription Product with WPScribe 2Checkout

You can configure the settings from, WP Admin > Products > Add New > Product data - Subscription Product. Please choose **Payment Method**, as WPScribe 2Checkout from the drop down Subscription tab. Click on 2Checkout Configuration.

This fields information needs to be identical as 2Checkout accounts product. Please note, the price used here is actually same as regular price of product. Let's move to create a 2Checkout product.

13/17

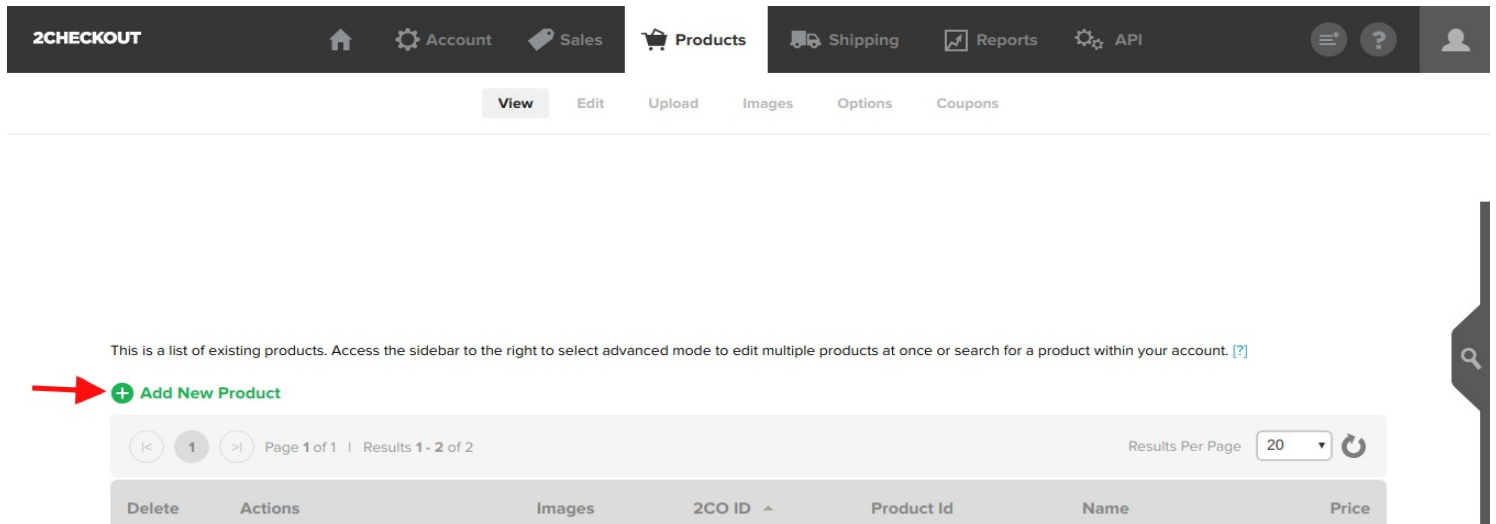

## Configure Product On 2Checkout

Logged in <https://sandbox.2checkout.com/sandbox> for sandbox users.

Logged in <https://www.2checkout.com/> for live users.

Here we consider the sandbox account.

From your account dashboard click on Products tab.

click on Add New Product.

All the information filling here, is used for your 2Checkout Configuration of Subscription Product.

## 7) Configure Subscription Product With 2Checkout

### Create Product ""

To Create a product, type the information requested in the following sections. [\[?\]](#)

Product Information	Select Options (optional)	Add Images (optional)
<p>Name <a href="#">[?]</a></p> <input type="text"/>	<p><a href="#">+ Add New Option</a></p>	<p><a href="#">+ Upload Image</a></p>
<p>Your product ID <a href="#">[?]</a></p> <input type="text"/>		
<p>Short Description <a href="#">[?]</a></p> <input type="text"/>		
<p>Long Description <a href="#">[?]</a></p> <input type="text"/>		
<p>Price <a href="#">[?]</a></p> <input type="text"/>		
<p>Tangible <a href="#">[?]</a></p> <p><input type="radio"/> Yes <input checked="" type="radio"/> No</p>		
<p>Recurring <a href="#">[?]</a></p> <p><input type="radio"/> Yes <input checked="" type="radio"/> No</p>		
<p>Approved URL <a href="#">[?]</a></p> <input type="text"/>		

Save Changes

After fill the form, click on Save Chnages button.

Take all the information and put into 2Checkout Configuration of Subscription Product.

## 8) Cron Set Up

You need to create a Server Cron which actually hit your Home Page for every minutes.

For example:

Your site is: `https://example.com`

Then in `example.com` server setup a cron which hit `https://example.com` URL for every minutes.

If you did not able to do that, please contact with Server Support to make this.

It actually rectify the WP Cron system's problem.

This manual is made on below specification's.

- PHP, 5.6
- WordPress, 4.9.6
- WooCommerce, 3.4.3

Stay connected with us for getting updated manual once available.
